

POWERFUL PERFORMANCE

THE EXPANDED HIAB HEAVY CRANE RANGE

MAKE POWERFUL

Some jobs require a little more muscle. With the three new big cranes added to our HIAB heavy range, you have more options than ever for powerful lifting close to the truck. The HIAB X-HiPro 362, X-CLX 328 and X-CLX 388 are specially built to give you up to 10% more lifting power, so that you can move those bulky loads that require less outreach.

Performance that you define

Only you can determine your performance needs. That's why all HIAB big cranes are fully adapted for your task. The whole crane is tailored to your business, down to the last detail. With a purpose-built crane optimized for your capacity, you get more from the same steel structure, and the fine-tuned hydraulics ensure smooth operation with no surprises.

Part of a big family

The HIAB family of big cranes is large – and growing. Whether you want exceptional reach and precision for delicate work or extra muscle for large, bulky items, we have a big crane to match.

The big cranes in this brochure are specialised for close-in work with heavy and awkward loads, giving you the very best in strength, speed and reliability.

CHOICES

Technical data	HIAB X-HIPRO 362	HIAB X-CLX 328	HIAB X-CLX 388
Lifting capacity (kNm)	329	297	336
Lifting capacity (tm)	33,6	30,3	34,3
Outreach, hydraulic extensions (m)	8,0 – 15,1	8,0 – 15,1	8,0 – 15,1
Outreach, with manual extension (m)	17,4	17,4	17,4
Installation space required (mm)	1120 – 1240	1120 – 1240	1120 – 1240
Height in folded position (mm)	2380	2380	2421
Weight in standard version, without stabilisers (kg)	3154 – 3726	2990 – 3565	3223 – 3826
Weight, stabiliser equipment (kg)	454 – 556	454 – 556	454 – 556

BUILT FOR LONG-TERM

HIAB big cranes offer more than powerful lifting. They also provide true dependability. Each crane is built with innovative technical features to give you unmatched speed and strength – from day one and for years to come.

Rack-and-pinion slewing

With the toughest jobs, you have to have equipment that you can count on. For heavy and awkward loads, HIAB's time-tested, powerful rack-and-pinion slewing gives you the reliability that you need. The sturdy casted base provides the highest levels of stability, and an oil bath ensures smooth and precise movements so your operators have full control – no matter what they lift.

HiPro or CLX control system

HIAB big cranes combine strength and reliability with unbeatable ease of use, whether controlled manually or with a remote. Your choice of control system depends on how you work and the level of precision you need.

HIAB X-HiPro 362 gives you the most advanced remote control system in the industry. With a high flow of oil that allows many simultaneous movements, it ensures the highest speed and precision – for the greatest productivity.

With X-CLX 328 and X-CLX 388, you get a rugged and reliable manual control solution. It has a cross-control setup, which simplifies operation by placing the same lever sequence of both sides of the truck. XS Drive remote control is an option for the CLX model.

PERFORMANCE

Automatic Speed Control (ASC)

Pump Flow Distribution (PFD)

Integrated subframe

Easy tilting of stabiliser legs

Load Stability System (LSS)

LSS automatically dampens abrupt stops that could otherwise cause the load to swing. This makes crane operation faster and smoother and helps protect the cargo, the vehicle and the work environment in the vicinity of the crane against potential damage.

EP boom system

The EP boom system of HIAB big cranes provides longer and lighter individual extensions. Steel with ultra-high tensile strength ensures structural integrity and the ability to handle heavy loads, in addition to offering considerable savings in weight. The result is greater outreach with more net capacity for lifting bulk.

ACCESSORIES THAT ENHANCE YOUR EQUIPMENT

Extend the versatility of your HIAB crane by adding one or more tools from the wide range of HIAB accessories. Manufactured to the highest standards, they enhance functionality and performance.

HPXdrive

The HPXdrive is a maintenance-free and extremely robust bucket, available in two versions: standard and heavy-duty. Thanks to the constant closing force, an HPXdrive is a perfect choice for tough applications such as digging.

Rotator

A sturdy rotator is an important workhorse, especially when it comes to handling heavy or bulky loads with precision. We offer a wide range of gear-type and vane-type rotators, with shaft or flange attachments for connecting them to other accessories.

Pallet fork

Handling loads with a pallet fork has a number of advantages. Since the load is palletised and lifted from underneath, it is possible to lift many different types of loads – including soft and flexible loads as well as solid ones. A pallet fork is also less expensive than the main alternative, a brick grab.

Hydraulic hook

A hydraulic hook is used to pick up the pallet fork from the truck body in a more safe and efficient way. When the hook is used, the driver no longer has to climb up and down from the vehicle. The hook can also be used for attaching and detaching slings in remote positions.

Brick grab

There is a lot to gain from using a brick grab, including speedier handling of your loads. The load does not have to be palletised, and it can be handled even in awkward positions where space is limited. HIAB brick grabs are extremely versatile and made to withstand heavy-duty work – all day, every day.

Easy to mount, easy to service

When choosing Hiab Selected Accessories, you can be sure to get the most out of your equipment. Hiab Selected Accessories live up to the market-leading Quality and Performance standards set by Hiab.

POWERFUL SUPPORT

When you choose a HIAB big crane, you choose a crane that will stay with you over the long haul. Hiab will be with you too, providing world-class service and support. Our commitment to quality and reliability goes beyond the crane itself to include parts, services and preventive maintenance.

Thinking ahead

HIAB big cranes are optimally built for easy mounting on the truck chassis. The whole installation, including any necessary chassis reinforcements, is designed for the lowest possible overall weight.

To make installing your crane simple and quick, we provide complete documentation including technical data, installation instructions and software for calculating axle loading and stability.

Your time is valuable

HIAB big cranes are designed for easier everyday maintenance. Key parts and components that require regular attention are located where you would expect them, and where they are easy to access. A good example is the integrated oil tank in the crane base, which can be installed without rearranging truck components and is quicker and simpler to reach.

When more is required, our fully trained and accredited service personnel know all there is to know about your HIAB crane. Above all, they know the importance of servicing or repairing it as quickly as possible. With the absolute minimum downtime, they get your product back in business and making a profit.

From parts to people

Original spare and wear parts of the highest quality ensure that your HIAB light crane will always be a HIAB product. In other words, they give you the same functionality, performance and safety you have chosen from the start.

With the largest service network in the industry, you are never far away from our skills and expertise. Like our cranes, our people work harder and go further for you.

Hiab ProCare™ for planned performance

In every way, our aim is to keep you moving so you can deliver as promised. With Hiab ProCare™*, we can take on the burden of inspections, planned maintenance, scheduling and more, giving you the best assurance to produce as planned. Simply choose the level of service agreement that makes sense for your business:

Hiab ProCare™ Inspection makes it simpler and easier to comply with inspection regulations for your crane. With the thorough yet efficient scheduled inspections, it is possible to prevent a number of unpleasant surprises and you are back on the road fast.

Hiab ProCare™ Essentials is the best addition to your new crane, including the preventive maintenance programme and scheduled inspections as recommended by Hiab. Put your maintenance planning in our hands and we keep your crane operating with the original high performance to avoid un-necessary cost and downtime.

*Check the availability of service agreements with your local Hiab distributor

BUILT TO PERFORM

Hiab is the world's leading provider of on-road load-handling equipment, intelligent services and digitally connected solutions. Hiab's offering encompasses class-leading load handling equipment including HIAB loader cranes, LOGLIFT and JONSERED forestry and recycling cranes, MOFFETT truck-mounted forklifts, MULTILIFT demountables, and tail lifts under ZEPRO, DEL, and WALTCO brands. As the industry pioneer, our commitment is to increase efficiency in our customers' businesses and to shape the future of intelligent load handling.
